EXPERIENCE

NASHVILLE SOFTWARE SCHOOL

Apprentice Software Developer, 07/2016 - 06/2017

- Comprehensive boot camp focused on full-stack software development problem solving with AngularJS and C#/.NET
- Applied the principles of Scrum, version control, wireframing, ER diagramming, and database normalization through individual and group projects
- Created single-page applications with HTML, CSS, Bootstrap, Materialize, jQuery, and AngularJS
- Automated SASS compilation, linting, and bundling with Grunt
- Utilized C#/.NET, Web API, and MVC to create API endpoints
- Practiced OOP and TDD principles with MS-Test and Moq
- Deployed front end capstone project with Firebase

BRENTWOOD UNITED METHODIST CHURCH

Database Management Specialist, 11/2016 - Present

- Design and implement user-requested reports with Arena, the database's front end platform
- Adjust existing Arena styling with CSS
- Troubleshoot errors and provide insight to the data team

SERVICESTOURCE

Operations Services/Business Intelligence Analyst, 04/2014 - 11/2016

- Leveraged automated VB tools with SQL and Excel to execute weekly ETL
- Delivered daily, weekly, and quarterly dashboards to Sales Management
- Maintained both in house and client facing CRM's, including Microsoft Dynamics CRM, Sales Force, SalesLogix, Lotus Notes, and various Cisco data stores
- Assisted Sales Managers in developing reports to proactively prevent customer churn, while supporting the Sales Team with data integrity and system troubleshooting

PROJECTS

SOFTWARE ADOPTION DASHBOARD - FRONT END

- Monitors the active user count of companies that have been pitched a new software offering
- Utilized AngularJS, Angular-Charts, and Materialize for front end design
- Employed Firebase for data persistence and deployment
- software-adoption-dashboard.firebaseio.com
- github.com/alexsaber89/Software-Adoption-Dashboard

SALES PRODUCTIVITY TRACKER - BACK END

- Company portal that allows sales reps to submit daily productivity data and request time off
- Utilized C#/.NET, Entity, Identity, and Web API for the back end
- Employed AngularJS with Bootstrap for the front end
- github.com/alexsaber89/Sales-Productivity-Tracker
